Social skills and competences	<p>Teaching: I have dealt with teaching, concerning various subjects and levels (from 8th grade students - Bucharest Central School to university students - SNSPA and University of Philosophy). I have taken as well part in the corresponding evaluation activities. As formal training concerning this activity, during my pre-graduation years, I have taken part in a 4 year facultative teaching class at the end of which I have obtained a corresponding certificate from the Ministry of Education.</p> <p>Team work: The main source of experience in this field is my collaboration with the Pro Democratia Association. A certain amount of experience in this matter I have also obtained from my collaboration with the Romanian Society for Radio Broadcasting as news editor.</p> <p>Dialogue: Many of my formal and non-formal activities provided me with a skill for "talking to people". To this aspect of my education contributed many things, from my day to day contact with friends, familiar and unfamiliar persons to my formal training in sociology, logic and argumentation.</p>
Computer skills and competences	<p>My computer skills amount to the general standard use of the computer (Windows, Microsoft Office, Internet, various utilitarian software like cd/dvd burning programmes, maintenance programmes etc.). As I have already mentioned in the Education and Training field, in 2003 I have taken part in a one month computer training programme. The programme focused on such software as the one previously mentioned. Subsequently I have obtained a corresponding certificate from the Ministry of Work.</p>
